

ETFO/Drake University Credit Course Summer 2010

Meaningful Activities to Generate Interesting Classrooms (MAGIC) trains educators to develop classroom relevance for students through activities, games, and simulations. Through participation in classroom activities, the program demonstrates how to achieve maximum student curriculum interest through Introductory, Informational, Practice, Review, and Culminating activities which reinforce important knowledge, skills and values.

This course:

- * Explores planning and assessing classroom activities
- * Models the use of reflective journals and portfolios
- * Demonstrates and uses "cooperative learning" principles
- * Provides classroom appropriate activities, games and simulations

Location TBA depending on geography of participants

Dates August 9- 13 9-4

Cost \$ 475 for credit or \$ 350 for personal professional development (no transcript offered)

Instructor: Bill Pike
